Priyansh Sharma

Python Developer | FastAPI · REST APIs · MySQL · AWS

Noida, India | +91 8791426635 | sharmapriyansh482@gmail.com | LinkedIn | GitHub | Portfolio

Summary

Python developer with hands-on experience designing RESTful APIs, JWT-based authentication, and database-driven applications using FastAPI, Pydantic, and MVC architecture. Built 4+ Python projects covering secure authentication, real-time analytics, and async API design. Comfortable with MySQL/SQLite database design, AWS (EC2, S3) deployment, Docker, and Git-based agile workflows, with a focus on clean, maintainable code.

Technical Skills

- **Core Backend (Python):** Python, FastAPI, Pydantic, REST API Design, JWT Authentication, OAuth2, MVC Architecture
- **Databases:** MySQL, SQLite, SQLAlchemy, Database Design
- **Cloud & DevOps:** AWS EC2, AWS S3, Linux, Docker, Git, GitHub, Postman
- **Additional Web Skills:** JavaScript, HTML5, CSS3, Bootstrap, Tailwind CSS, jQuery, AJAX, React (basic)

Experience

Junior Software Developer *Sep 2025 – Present*

CodeFire Technologies Pvt Ltd *Noida, India*

- Designed and integrated RESTful APIs with AJAX-driven UI updates, eliminating full-page reloads and cutting average interaction response time by 30%.
- Optimized backend logic and database queries to handle large data volumes, improving load times by 40%, while managing schema changes and data migrations across MySQL production environments.

Key Project Contributions:

- **Physician–Patient Healthcare Platform:**
  - Contributed to backend functionality supporting physician, patient, nurse, and pharmacy-related workflows.
  - Built and maintained business logic modules using Python, PHP, and CakePHP, with HTML, CSS, and JavaScript on the frontend.
- **Crop & Farmer Management Platform:**
  - Developed backend workflows covering crop types, subscriptions, sales, and unsold-crop tracking using PHP and CodeIgniter.
  - Implemented business logic and UI components with HTML, CSS, and JavaScript to support farmer and crop data management.
- **Business Management Platform:**
  - Built backend business logic and API functionality using the Yii2 framework.
  - Collaborated on integration with a React-based frontend to support core business operations.

Projects

Shrink – URL Shortener with Click Analytics

github.com/PriyanshSharma80/shrink-url-shortener

- Full-stack URL shortener with real-time click analytics; supports custom aliases, link expiry, and logs each click by timestamp, IP, and user-agent.
- *Technologies: FastAPI, Pydantic, SQLite, SQLAlchemy, React*

Secure Notes App with JWT Authentication
github.com/PriyanshSharma80/Notes_App

- Production-ready REST API with JWT-based authorization and bcrypt password hashing; encrypted user data at rest and enforced role-based access on all notes endpoints.
- *Technologies: FastAPI, MySQL, JWT, REST API, Python*

Jarvis Voice Assistant
github.com/PriyanshSharma80/Jarvis_voice_assistant

- Python voice assistant combining speech recognition, text-to-speech, and web searches, app launches, and system-level commands via voice.
- *Technologies: Python, SpeechRecognition, pyttsx3*

Mood-Based UI Customizer
github.com/PriyanshSharma80/Mood-Based-UI-Customizer

- Real-time emotion-detection system using face-api.js for in-browser facial analysis, backed by an async Python API layer serving model predictions to drive dynamic UI theming.
- *Technologies: HTML, CSS, JavaScript, face-api.js, Python (async API)*

Education

Master of Computer Applications (MCA) *2023 – 2025*
SRMS College of Engineering & Technology, AKTU, Lucknow

B.Sc. in Mathematics *2020 – 2023*
Bareilly College, MJPRU, Bareilly

Languages

Hindi: Native | English: Professional
